Technical Ideas

Recommendation: Buy Godrej Consumer Products Ltd

Suggested Range: Buy around 1586

Target: 1690 / 1800

Holding Period: upto 30 days

Stop loss: INR 1477 closing basis

Technical Rationale: Godrej Consumer Products Ltd has been trading in an upward sloping channel since February this year. It has been holding on to the lower end of the channel and has been trading positive. The Stochastics oscillator has reached the oversold region and in terms of price it has reached a crucial support cluster which makes it a good buy at current levels. In Thursday's trading session it has reached the crucial support cluster of the 40 day moving average, the lower end of the channel and the daily lower Bollinger band. We expect this support cluster to hold and the stock to reach levels of 1690 which is the previous swing high and above that 1800 which is the upper end of the channel.
